

E-Waste Recycling Services

The rapid increase in electronics has created a growing stream of used devices in need of appropriate management. According to the US EPA, only 25% of discarded computers, printers, copiers and mobile devices are collected and properly recycled – with the rest ending up in landfills and incinerators. Lantium provides secure and compliant data destruction and electronic waste recycling to ensure your out-of-service electronics are properly disposed of without the need to pick through the equipment piece by piece. Following local, state and EPA regulations, we help your organization recycle computers, laptops, and other electronic components and offer various data destruction solutions to ensure your organization stays secure and compliant.

Secure & Compliant Data Destruction

Don't just toss out old hard drives, erase them, or stockpile them in storage. Physically destroying your hard drives is the only way to ensure information is unrecoverable, safe and compliant. Lantium's data destruction services helps protect your organizations confidential information when retiring and disposing of IT assets. We work with R2 and NAID certified IT asset disposal (ITAD) and data destruction service providers to ensure your out-of-service IT assets and data are recycled and disposed of in an environmentally responsible and secure manner. These processes, which includes hard drive and paper shredding, are carried out locally at a secure DEP permitted & bonded computer disposal facility by staff that have been thoroughly screened — giving you peace of mind that the disposition of your out-of-service electronic devices will not put you at risk with the following benefits:

DATA DESTRUCTION	
Item(s)	Price
Secured wiping and computer recycling	\$5 per unit
Hard drive shredding <i>(includes asset reporting by serial number)</i>	Onsite for \$20 per unit (\$300 min.) Offsite for \$10 per unit (\$50 min.)
Paper shredding	Call for pricing
Appliances and Furniture	\$0.35 per pound

** A flat transportation fee of \$250 applies to all pickups*

Services

- Affordable level I data destruction
- Hard drive shredding services with audit trail and certificates
- Degaussing services with audit trail and certificates
- HIPAA, FACTA, and Gramm-Leach-Bliley Act compliant data wiping and destruction
- \$1,000,000 in professional liability insurance

R2 Certified Recycling

Improperly recycled e-waste can put our waterways, soil, and air at risk -- endangering human health and the environment if not handled properly. In fact, IT equipment has become the number one source of toxins at area landfills due to the potentially harmful materials and chemicals found in many of these devices. It is also important to note that the production of new electronic devices requires a significant amount of resources to make, with many of the same materials recoverable through recycling. It is believed more than 70% of collected electronics can be reused, repurposing items such as plastics, steel, aluminum, copper, gold, silver and other precious metals. Lantium believes in protecting the environment which is why we offer our client's easy and affordable ways to properly recycle out-of-service IT assets responsibly -- giving them a second life as refurbished equipment or taken apart and used in new products.

ELECTRONICS	
Item(s)	Price
Computers, laptops, non-CRT monitors, printers, fax machines, telephone systems, scanners, keyboards, mice, peripherals, UPS batteries, LCD monitors, LCD & plasma TVs and monitors	No Charge
Tube TVs and CRT monitors	\$30 per unit

* A flat transportation fee of \$250 applies to all pickups

Accepted Items

By recycling, organizations can do their part to preserve the environment for future generations. Lantium offers a way to get rid of old, retired electronics safely, responsibly and without the need to pick through the equipment piece by piece. We accept a very broad range of items for disposal and recycling, including the following:

Computer Components

- Power Supplies
- Motherboards
- PCI Cards
- Memory
- Hard Drives
- Computer Fans
- Drives
- Tape Backup

Monitors

- LCD monitors
- CRT monitors

Networking

- Routers
- Switches
- Wireless Routers
- Access Points
- Bridges
- Firewalls
- Cabling
- Modems
- KVM Switches

Office Equipment

- Phones/Phone Systems
- Ink/Toner
- AC Adapters
- Projectors & Overhead Displays
- VCR & DVD Players
- Typewriters

Consumer Electronics

- VCR
- DVD players
- Gaming Systems
- Wire
- X-Mas lights
- Cable Boxes
- Radios
- Etc.

Universal Waste

- (additional fees apply)
- Alkaline household batteries
 - Fluorescent lamps
 - Compact Fluorescent Lamps
 - Ballast (non-pcb)

Retail Equipment

- POS systems
- cash registers
- bar code scanners
- magnetic card readers
- Screens
- receipt printers

Servers & Server Components

- Rack Servers
- Tower Servers
- Networking Equipment
- UPS Backups
- Data Silos
- Cabinets & Racks
- Tapes
- Hard Drives
- CD
- ZIP Drives
- Disk Arrays
- SAN
- Flash Drives

Small Freon Appliances (additional fees apply)

- Air conditioners
- Dehumidifiers

Printers/Copiers

- Desktop Printers
- Commercial Printers
- Plotters
- Copiers
- Dot Matrix Printers, Ink & Toner

Misc.

- Appliances
- Furniture
- Paper
- Cardboard
- Styrofoam
- Plastic
